

PIONEER

RFP Engine

MOTOROLA
SOLUTIONS

Meet Pioneer

- **Automated Extraction:** Every question and requirement is instantly extracted from the request document.
- **Intelligent Assembly:** Answers are securely generated from loaded datasheets and assembled into a response package.
- **Configuration-Aware:** Tailor responses seamlessly between platforms like Unity and Alta, and switch between Video and Access Control
- **100% Local Security:** Powered by local models to ensure sensitive bid data never leaves our internal environment.

Live Demo Agenda

1. Configure

We will set our targeted platform parameters (e.g., Unity or Alta) and specify the system components for the bid.

2. Ingest

Watch how we drop in complex .pdf, .docx, or .xlsx request documents directly into the Pioneer engine.

3. Process

See the local AI instantly parse requirements and draft the preliminary response package in real-time.

Questions & Answers

Pioneer RFP Engine — Support & Resource Directory

[Pioneer RFP Engine Download](#)

Download the desktop application, manage configurations, and run automated extractions.

[Pioneer RFP Engine Release Page](#)
